

Transform Financial Management with Intelligent Automation

Save time and reduce risk with data capture, analytics, and automation solutions designed specifically for the financial services industry.

The 5 Challenges Scan2x solves in Finance

Problem 1 · Integration

Fragmented processes across systems

Scan2x connects capture, extraction and routing into a single continuous flow, eliminating manual handoffs and information silos.

Problem 2 · Efficiency

High dependency on manual data entry

Automatic extraction and validation drastically reduce processing time and eliminate human error in invoices and financial documents.

Problem 3 · Versatility

Multiple document formats without standards

Processes invoices and financial documents regardless of format — PDF, image, text — without templates or complex configuration.

Problem 4 · Compliance

Lack of regulatory visibility and traceability

Provides full traceability and real-time auditing, meeting AML, GDPR and audit-trail requirements for finance teams.

Problem 5 · Time-to-Value

Traditional automation is slow and costly to implement

Minimal setup, no template dependency, fast deployment.

End to end Financial Automation Flow

Key Benefits for Finance Teams

Full automation
Replaces manual work with unattended automated processes

High-accuracy extraction
Intelligent algorithms eliminate transcription errors

Scalability
Grows with your organisation — pay only for what you use

Bank-grade security
Encryption, Active Directory, granular permissions

Real Results in the Financial Sector

By combining the simplicity of capture with Scan2x and the automation of Therefore, Avantech proved themselves to be our valued digitisation partner

- ✓ Deployment across 50+ branches with centralized scanning profiles
